

119) Sort and find maximum element

CODE:

```
def find(a):  
    a.sort()  
    return a[-1]  
a=[5,4,3,2,1]  
print(find(a))
```

OUTPUT:

A screenshot of a Windows command prompt window. The title bar shows the path 'C:\Windows\system32\cmd.e' with a close button. The window content displays the output of the Python code: the number '5' on the first line, followed by the text 'Press any key to continue . . . |' on the second line, with a vertical cursor at the end.
